Summary

B.Tech Computer Science graduate (CGPA: 9.24/10) with experience in backend development, full-stack web applications, and AI-powered software systems. Skilled in Java, Python, React, Node.js, SQL, and REST APIs, with hands-on experience building scalable backend services, automated evaluation platforms, and production-ready applications. Strong foundation in data structures, algorithms, and software engineering principles.

Experience

Agentic AI Eval Engineer Intern, RealPage India pvt lt. Oct 2025 – Apr 2026

- Contributed to the development and maintenance of backend services for per-call AI agent conversation evaluation and enhanced the platform that surfaces and visualizes evaluation results.
- Developed LangSmith-based automated evaluation pipelines, implemented and debugged AI agent features, and collaborated with engineering teams to improve production reliability and validate releases.

Biometric Authentication Using EEG , Research Project under Dr.Banee Bandana Das Sep 2025 – Jan 2026

- Processed EEG signals from the BED dataset to develop deep-learning–based subject-identification models.
- Designed and evaluated multiple architectures, including CNN+LSTM, BiLSTM, and autoencoder–CNN-LSTM hybrids.
- Focused on improving accuracy, for biometric authentication by extracting temporal and spatial EEG features.

Projects

CONNECT SRMAP *(MERN stack Project)* Jan 2025 - May 2025

- Developed MERN stack social networking app, designed MongoDB schemas for users/posts; implemented RESTful APIs built React.js frontend and modern UI with TailwindCSS.
- Implemented domain restricted authentication and OTP based email verification via email API, improving onboarding security. added pagination/infinite scroll to handle data growth, and image handling with Cloudinary.
- Built an interactive feed UI using ShadCn with efficient state management using React Routers.
- Implemented Redux and Added real time error handling: on failed API calls displayed immediate popup notifications.

Privacy Protector AI - Multi Step Self Reasoning AI Oct 2025 - Nov 2025

- Designed and developed scalable backend services using Python, FastAPI, PostgreSQL, and JWT authentication.
- Integrated external APIs for secure information retrieval, request classification, and structured data processing.
- Implemented fault-tolerant workflows, authentication, and database persistence with emphasis on reliability and security.

SkillForge AI *(Deccan AI Catalyst Hackathon 2026)* skill-forge-ai-three.vercel.app

- Built and deployed an AI-based platform that parses resumes, compares them with job descriptions, and generates personalized learning roadmaps based on skill gaps.
- Developed an adaptive conversational assessment system that dynamically adjusts question difficulty based on candidate responses to evaluate actual proficiency.
- Implemented a 3-tier architecture using React + Vite, Node.js + Express, Python FastAPI, PostgreSQL, Prisma, and Groq Llama 3.3 for AI-driven analysis and resume processing.

Skills

Languages and Paradigms:	Java, Python, JavaScript, TypeScript, C++, SQL
Frontend :	React.js, Next.js, HTML, CSS, Tailwind CSS
Backend :	Node.js, Express.js, REST APIs, JWT Authentication
Databases :	PostgreSQL, MongoDB
Tools :	Git, GitHub, Postman, VS Code, Prisma

Certifications

Udemy Fullstack Development Course The Complete Full-Stack Web Development Bootcamp, The Joy of Computing Using Python, Java Programming Online Course [Complete Beginner to Advanced] GFG.

Education

SRM University–AP, B.Tech in Computer Science Engineering (CGPA: 9.24/10.00) Jun 2022 – May 2026

SRI SRINIVASA GRAVITY COLLEGE, Vijayawada — Intermediate (95.9%) Jun 2020 – May 2022

Nirmala High School, I–X (77.17%) Mar 2020
